

WHERE GREAT CABINETRY BEGINS

designed by Donna Venegas

## An Acorn Kitchen for THIS OLD HOUSE®

Acorn Kitchens was recently featured on an episode of THIS OLD HOUSE® – a show offering homeowners trusted information and expert advice on home improvement and renovation. In this episode, a family was renovating the house of their dreams with the intention of staying a lifetime. Acorn created cabinetry for their kitchen that would help them achieve that dream.

## Designed with function in mind

The new layout expands on the old galley kitchen's square footage. The center island is designed to keep the prep area close to the cooking area, and it includes ample seating for everyone to be in the room while the cook works.

## Traditionally tailored

The Newton Project kitchen is based on traditional style cabinetry to match the home's late nineteenth century architecture. The moldings and trim around the island and range hood are simple and elegant for a look that will stand the test of time.
